

Your Roof Can Be Cleaned!

Safely removes algae, black streaks, moss and mildew

With its food source being the limestone filler in asphalt singles, Roof Algae (*Gloeocapsa Magma*) has successfully migrated north and is thriving in the humid climate of Michigan.

Roof Cleaning Facts

1. Many roofs are replaced prematurely due to appearance, *NOT* shingle failure.
2. Having your roof cleaned can restore its true color and help maintain proper shingle life.
3. Our process safely kills, disinfects and removes algae, moss, mold, mildew, bacteria and fungus.
4. We employ the "Soft-Wash" method, High Volume, Low Pressure... does not harm shingles.

Safe for
Asphalt
Shingles

Also great on vinyl siding, fences, decks, cedar shakes, brick and concrete. Restores that "like new" appearance. We use "Eco-Friendly" plant and animal safe, non-chlorine based cleaners.
